düvelsdorf

Machinery and equipment for agriculture and forestry

Valid from 07.02.2022

Because perfect grassland
begins with technology.

You can find our machinery as well as a lot of useful information about grassland maintenance in our complete range of grassland maintenance technology. Please feel free to contact us or your dealer.

düvelsdorf

GRASSLAND MAINTENANCE TECHNOLOGY | Complete Range

QUALITY FROM OUR OWN PRODUCTION EXPERT, EXACTING AND RELIABLE

The düvelsdorf company is your expert partner for the development, manufacture and distribution of machinery and equipment for agriculture, municipal services and industry.

In more than 90 years, düvelsdorf has developed into an agricultural machinery manufacturer operating throughout Europe. The machines stand out in particular for their long service life and practical handling.

The new düvelsdorf product catalogue gives you a complete and quick overview of our diverse range.

If you have any questions about the products, please contact your local düvelsdorf dealer, who will be delighted to help you.

Sincerely your
düvelsdorf Team

The municipal rake **GREEN.RAKE mini** stands out with its compact size of 1.50 m or 2.00 m. The **GREEN.RAKE mini** is ideal for use in municipal areas or in fruit-growing and viticulture.

It flattens piles of earth and ventilates the turf in various stages, thereby making it the perfect machine for grassland maintenance e.g. in tree plantations or parks.

- Attachment category CAT 1
- Adjustable tine section
- 10 mm tines
- 83 mm tine spacing
- Powder-coated frame
- Tine guard

Designation	kg	PG	Art. No.

Municipal rake 2.00 m	178	26	13200

Grassland harrow 2 m, 3-row

Grassland harrow 3 m, 3-row

- Available in 3 rows: Harrows 2 m, 3 m, 4 m and 5 m
- Available in 4 rows: Harrows 4 m, 5 m, 6 m and 8 m
- 3-point attachment (lower linkage ball diameter 44 mm, lower linkage spacing 435 mm): Harrows 2 m, 3 m, 3-row and 4 m, 3-row
- 3-point attachment CAT 2 (strengthened): Harrows from 4 m, 4-row
- Assembly kit for hydraulic folding of the side elements incl. safety lock possible for harrows from 4 m
- Optimum ground adjustment
- Robust hinge technology
- Quickly ready for work
- Full number of cast stars to make use of the complete working width
- Minimised wear of steel rings due to optimised shape of cast stars
- Combination stars made of high-quality grey cast iron
- Powder-coated frame
- Transport width 2 m: 2.10 m
- Transport width 3 m: 1.75 m
- Transport width 4 m, 4 m 4-row, 5 m 4-row: 2.10 m

Note: Delivered unassembled. Assembly time: approx. 2-3 hours.

LDO 6 m

The grassland harrow LDO with 6 m working width and 4-row harrow mesh is a further development of the tried and tested 6 m grassland harrow.

It is open at the rear for even better adjustment to the ground.

The sturdy hinges at the front and rear guarantee a high level of stability.

- Robust 3-point attachment CAT 2
- 4-row
- Light frame
- Powder-coated frame
- Hydraulic hinge
- Safety lock for safe road transport
- Transport width: 2.90 m

HDO 6 m, unfolded

The grassland harrow HDO is a grassland harrow based on the HD harrow. The frame's open construction ensures a particularly good adjustment to the ground to ensure excellent flattening of molehills, cow pat and other residues.

The grassland harrow HDO is equipped with the heavy 4.5 kg HD stars.

- Robust angle iron frame
- Powder-coated frame
- Robust 3-point attachment CAT 2
- Large hinges
- Safety lock for safe road transport
- Heavy 4.5 kg HD stars
- Transport width: 3.00 m

Optional

- Seeders
- Tread
- Skid
- LED lighting set

Grassland harrow HD 6 m, 4-row

The grassland harrow HD has a particularly robust frame. The robust joints, the strong 3-point hitch and the large cylinders make the HD suitable for professional use. A safety lock comes as standard on the hydraulic cylinders to prevent the harrow from opening unintentionally when driving on the road.

The grassland harrow HD is equipped with 4.5 kg HD stars.

- Powder-coated frame
- Robust 3-point attachment CAT 2
- Large hinges
- Safety lock for safe road transport
- Heavy 4.5 kg HD stars
- Transport width: 3.00 m

Optional

- Seeders
- Tread
- Skid
- LED lighting set

Grassland maintenance

Rollers

Mowers / Mulchers

Silage technology

Buckets / Forks

5 good reasons for maintaining grassland.

1 Grassland maintenance increases the basic feed quantity and quality.

2 Damaged grass cover can be regenerated with the right maintenance technology and thus avoid the need for new planting.

3 Raking and reseeding prevent the growth of unwanted, inferior quality grasses such as rough bluegrass, and enable the establishment of high-quality grasses and herbs.

4 Strong grass cover is more resistant to damage when it is driven over and during adverse weather conditions.

5 With an outlay of just €100/ha an economic surplus yield of €300 - €500/ha is possible through raking and reseeding.

You can find our machinery as well as a lot of useful information about grassland maintenance in our complete range of grassland maintenance technology. Please feel free to contact us or your dealer.

GREEN.ROLLER classic

Seeders

We have a range of seeder designs so we can provide the right machine for every application. There are differences in the number of outputs and their diameters, as well as in the blower drive unit and the resulting conveying capacity.

Three different controls are available for the seeders. The electric seeders (ES 8 Standard / ES 8 Turbo) are equipped with the Profi control. This allows the seeder to be switched on and off from the cab, the spread rate to be continuously adjusted and a calibration test to be carried out. The Profi Speed control is optionally available for the ES 8 Turbo, which enables speed-dependent sowing.

The **SEED.CON** control is available for all Turbo seeders.

This wireless control with intuitive user interface is controlled via your own smartphone or tablet.

All settings can be made either from the cab or directly next to the device. The control allows a speed-dependent regulation of the spread rate.

In addition to the use of a smartphone/tablet, operation (including parallel) can be executed via an ISOBUS terminal.

Grassland maintenance

Rollers

With the düvelsdorf **GREEN.ROLLER** classic meadow rollers, all components such as the unbraked/braked chassis as well as LED lighting can be retrofitted. Furthermore, the meadow rollers can be combined to form a coupled trailer.

- Robust frame made of 180 mm square tubing
 - Drum diameter approx. 1200 mm
 - Drum wall thickness min. 12 mm
 - Continuous shaft in the rolling element
 - Centre partition
 - 2 x water filler necks
 - Spherical roller bearings
 - Spring-loaded, adjustable scraper
 - Parking support, adjustable spindle
 - 2.70 roller has a transport width of 3.00 m
- Optional**
 - Chassis unbraked/braked
 - LED lighting set

GREEN.ROLLER classic chassis, unbraked

The unbraked chassis means the roller can be transported comfortably on public roads up to an axle load of 3000 kg and a speed of 25 km/h.

Standard equipment for the **GREEN.ROLLER** classic

- Tyres 11.5/80-15.3
- Axle unbraked
- Lighting with warning signs

GREEN.ROLLER classic chassis, braked

The roller can be braked via the compressed air brake system by swivelling the chassis over. The filled roller can be easily moved at speeds of up to 25 km/h in public road traffic. It is equipped with a compressed air brake system and a TÜV certificate for obtaining a general operating permit as standard.

Standard equipment for the **GREEN.ROLLER** classic

- Tyres 12.5/80-18
- Drum is braked by the chassis
- Axle braked
- TÜV certificate (not for 3 m)
- Lighting with warning signs

LAWN ROLLER

Ideal for use in gardens and municipal areas. Simply pull by hand with a handle or hang on to the ride-on mower with the towing eye.

- Diameter: 65 cm
- Working width: 85 cm
- Empty weight: 90 kg
- Weight filled with water: approx. 400 kg
- Wall thickness: 6 mm
- Adjustable, spring-loaded scraper
- With handle and towing eye as standard
- Powder-coated frame
- 2 x water filler necks

Designation	kg	PG	Art. No.
Lawn roller	90	30	12085

Agricultural technology | Complete range

Versatile soil rollers

TERRA.ROLLER eco 2.50 / 3.00 m

The **TERRA.ROLLER** eco with Cambridge or toothed rings ensures optimum reconsolidation in the field. Its compact design keeps the weight close to the tractor, making it easy to handle even with smaller tractors.

FRONT PACKER

The front packer is the ideal solution for a well-prepared seedbed. In addition, the soil is optimally reconsolidated.

TERRA.ROLLER expert with preparation tools

In the field, the **TERRA.ROLLER** expert professional roller impresses with uniform ground pressure and optimum adjustment to the terrain. The pressure is adjusted mechanically or hydraulically, depending on the equipment version. The hydraulically adjustable levelling bar for reconsolidating and crumbling the soil, as well as the knife roller for cutting stubble, catch crops and controlling the European corn borer, are available as options.

The **TERRA.ROLLER** expert can be supplied with a seeder on request.

The compressed air brake system, also available as an option, ensures safe road travel.

The **TERRA.ROLLER** eco with Cambridge or toothed rings is suitable for versatile tasks in arable and grassland. With the CAT 1 and CAT 2 three-point hitch, it can be used both as a front packer as well as a three-point roller at the rear.

It is also possible to couple the roller with the **GREEN.RAKE** expert in order to use it for grassland reconsolidation directly behind the rake. A seeder can also be mounted.

Additional information regarding the **TERRA.ROLLER** eco can be found in our complete range of grassland maintenance technology and agricultural technology. Please ask your dealer.

Designation	kg	PG	Art. No.
TERRA.ROLLER eco 2.5 m Cambridge Ø 460 mm NEW	760	29	29030
TERRA.ROLLER eco 2.5 m Cambridge Ø 550 mm NEW	1200	29	29230
TERRA.ROLLER eco 2.5 m toothed ring* NEW	1120	29	29130
TERRA.ROLLER eco 3.0 m Cambridge Ø 460 mm	830	29	30030
TERRA.ROLLER eco 3.0 m Cambridge Ø 550 mm	1110	29	40230
TERRA.ROLLER eco 3.0 m toothed ring*	1130	29	30130

* The toothed rings are made of ductile iron.

The düvelsdorf front packer is the solution for a well-prepared seedbed and therefore the ideal preparation for successful sowing. When the front packer passes over the soil, it optimally reconsolidates the ground and breaks clods of soil into fine crumbs. The reconsolidation prevents the tractor from sinking into the ground as much and reduces ruts. The front packer's half-shell toothed rings are made of high-quality ductile iron and have a high tare weight. The bolted connections allow quick assembly without dismantling the entire roller. Scrapers are placed between the rings to prevent sticking. The optional preparation tools increase the usefulness of the machine and are recommended depending on your soil conditions.

- Robust, powder-coated frame
- Half-shell toothed rings made of ductile iron

You can find more information in our complete range of agricultural technology. Please ask your dealer.

Levelling bar	300	27	11300
Knife roller	510	27	11200

The düvelsdorf drum mower **dCUT** is designed for use on all meadows and fields. Whether as a secondary mower for large farms, or as a single mower for part-time or small farms – this mower is suitable for all farm sizes. The drive shaft must be removed when swivelling into the transport position.

Grassland maintenance

Rollers

Blade carrier

Blades

Mowers / Mulchers

Silage technology

The düvelsdorf swing arm mower with 2 m working width is ideal for mowing long grass on small and medium-sized fields and pastures.

It is possible to mount the hitch in several positions so that the mulcher can be driven laterally offset behind the tractor.

The mowing height can be adjusted at the skids.

- Seed shaft as standard
- CAT 2
- For tractor sizes from 40 - 50 hp

Buckets / Forks

Designation	kg	PG	Art. No.
Swing arm mower 2 m	400	26	30200

Note: Delivered unassembled. Assembly time approx. 1 hour. Delivery does not include gear oil.

The silage roller, with its high tare weight and large drum, offers very good silage compaction with good rolling characteristics. The drum's twelve fins are used for deep compaction. When working in silage walls, the four rolling elements on the frame prevent damage to the silage roller and walls. By using the optional edge wheel (which can be retrofitted to any silage roller), the side/edge of the silage can be additionally compacted.

- CAT 2 / CAT 3
- Boom to horizontal: up to approx. 52° (adjustment range)
- Drum diameter: 1070 mm
- Water filling: 1000 l
- Towing eye: 15 t
- LED lighting
- Transport width: 3.00 m
- Max. total weight with 2 wheels: 3100 kg

Advantages of the silage roller

- High tare weight
- Individual ballasting with up to 1000 l water
- Deeply effective compaction when driving over silage
- Rolling element on frame for use in silage walls

Optional:

- Boom with/without wheel(s) (500/50 R 17)

Designation	kg	PG	Art. No.
Silage roller	1770	29	11300
Boom without wheel	135	29	11350
Boom with 1 wheel	220	29	11360
Boom with 2 wheels	330	29	11370

Grassland maintenance

Rollers

During the maize harvest, it is important for fodder to be levelled and compacted; this still has to be guaranteed even given the high efficiency rate of today's forage harvesters.

With a total width of 3.00 metres, the maize leveller does not exceed the permissible transport width for public roads. The 3.70 m maize leveller is only intended for use within the farm due to its dimensions. The blade is suitable for 3-point attachment CAT 2 and CAT 3 in front or rear hydraulics.

The pulling point between the bottom links allows other implements to be towed without putting load on the top link. Viewing slots give a good view of the working area.

Mowers / Mulchers

- Robust design
- Depth: 60 cm
- Height: 120 cm
- Side wall depth: 45 cm
- Wall thickness: 10 mm
- With towing eye
- Integrated skids

Silage technology

Telescopic maize leveller 3.00 m - 4.40 m	1800	29	21440
LED lighting set	4	37	12297

- Bale diameter: 1000 – 1500 mm
- Max. bale weight: approx. 800 kg
- Hydraulic drive, 1 x single-acting control valve + unpressurised return flow approx. 30 l/min
- Film stretcher for 500 mm or 750 mm film
- Wrapping time: approx. 1.5 minutes
- External loading
- Tilt table for bale unloading by lifting the three-point hydraulic system
- Electronic wrapping counter
- Semi-automatic film cutting
- Power requirement from approx. 40 hp
- Length 2600 mm, height 1570 mm, transport width 1200 mm
- CAT 2 three-point attachment

Spare tine 800 mm, each	4	35	19800

Continuous cone sleeves

Attachments for farmyard loader, wheel loader, telescopic loader per order - see p. 99

Practical manure and silage fork with hydraulic gripper. With two double-acting hydraulic cylinders, the tongs grip powerfully. This ensures that the goods to be transported remain. All tines are replaceable.

- EURO attachment
- Robust steel construction
- Wearing rail
- Tine length: 800 mm
- Tines with anti-twist feature

Note: A pressure relief valve is required for hydraulic pressure above 180 bar.

Designation	kg	PG	Art. No.
Manure and silage fork 1.20 m EURO, 2 x 6 tines	215	35	19544
Manure and silage fork 1.40 m EURO, 2 x 7 tines	235	35	19545

Manure and silage fork 2.40 m EURO, 2 x 12 tines	355	35	19584
Pressure relief valve	1	35	17960
Other attachments available on request (e.g. Weidemann, Schäffer, Volvo, Bobcat,...)			

Note: Delivered unassembled. Assembly time: approx. 1.5 hours.

Attachments for farmyard loader, wheel loader, telescopic loader per order - see p. 99

- 2 hydraulic cylinders
- Robust bucket substructure
- Large opening width: 1.50 m
- Removable side pockets
- Removal from the wall is possible with the gripper fully open
- EURO attachment
- Scrape rail
- Sturdy gripping tines

Dimensions:

- Bucket height: 630 mm
- Bucket depth: 860 mm
- Device height compl. closed: 930 mm

Please note

1.60 m power grab shovel bucket attachment is only possible with central locking lever. A pressure relief valve is required for hydraulic pressure above 180 bar.

Designation	kg	PG	Art. No.

Emptying position

The tipping bucket can be easily picked up with the forklift tines and is secured with a chain. It can be used for loading potatoes, onions, cereals and other bulk materials. The sturdy bucket is made of 6 mm sheet metal. It has a double-jointed frame. This frame allows the bucket to tilt backward (for transport) by 24 degrees and forward (for emptying) by 35 degrees.

Pressure relief valve	1	35	17960

Other attachments available on request (e.g. Weidemann, Schäffer, Volvo, Bobcat,...)

ROUND BALE FORK SOLO MECHANICAL

The round bale fork solo can be used universally with the EURO and CAT 2 attachment. The freely movable arms can be used to pick up round bales with a diameter of 0.8 m to 1.8 m without having to adjust the arms. The round bale fork can be optionally equipped with a cylinder with which the arms can be opened and closed hydraulically.

Advantages

- EURO / CAT 2
- Bale size: 0.8 - 1.8 m
- Load capacity: approx. 700 kg
- Use in front loader possible even without third control circuit
- Picks up bales quickly and easily
- No need to adjust the arms

Designation	kg	PG	Art. No.
Round bale fork solo mechanical	110	35	17740

ROUND BALE FORK SOLO HYDRAULIC

Designation	kg	PG	Art. No.
Round bale fork solo hydraulic	120	35	17745

ROUND BALE FORK EURO

- For front loaders with EURO attachment
- Sturdy tubular steel frame
- Load capacity approx. 600 kg
- Angled tips for an easy bale pick-up

ROUND BALE FORK COMBI

The Combi round bale fork can be used by different carrier vehicles due to its EURO and 3-point hitch.

- Load capacity approx. 600 kg
- 3-point attachment CAT 2 and EURO

Designation	kg	PG	Art. No.
Round bale fork EURO	82	35	17790
Round bale fork Combi	100	35	17785

ROUND BALE FORK, 3-POINT MECHANICAL

- For 3-point attachment
- Sturdy tubular steel frame
- Angled tips for an easy bale pick-up
- Load capacity approx. 600 kg
- 3-point attachment CAT 1 and CAT 2
- Bale size 0.8 - 1.3m

Designation	kg	PG	Art. No.
Round bale fork 3-point mechanical	74	35	17780

ROUND BALE FORK DUO

The round bale fork DUO is ideal for efficiently transporting 2 round bales. Versatile use with EURO and 3-point is made possible by the combination attachment.

- Load capacity 2 x 700 kg
 - 3-point attachment CAT 2, EURO
 - Opening width each side from 650 to 1000 mm
- Dimensions:
- Weight: 165 kg
 - Length: 1250 mm
 - Width: 2100 mm

Designation	kg	PG	Art. No.
Round bale fork DUO	165	35	17750

BALE CUTTING FORK

Attachments for farmyard loader, wheel loader, telescopic loader per order - see p. 99

- Individually bolted blades
- Two hydraulic cylinders, max. working pressure 200 bar
- Seven heavy-duty 800 mm tines

Dimensions:

- 7 heavy-duty tines
- Width: 1.8 m
- Bale size: max. 1.6 m
- Bale weight: max. 1400 kg

Note:

Pressure relief valve required from 200 bar

Designation	kg	PG	Art. No.
Bale cutting fork	585	35	27200
Pressure relief valve	1	35	17960

Other attachments available on request (e.g. Weidemann, Schäffer, Volvo, Bobcat,...)

BALE CUTTING BUCKET

The bale cutting fork with bucket is suitable for cutting silage bales up to 1.6 m in diameter. The hardened serrated blades cut the bale cleanly and easily. The device can also be used as a bucket for removing maize silage. Opening the cutting frame allows bulk material to be completely removed from the wall.

Attachments for farmyard loader, wheel loader, telescopic loader per order - see p. 99

- Individually bolted blades
- Two hydraulic cylinders, max. working pressure 200 bar

Dimensions:

- Volume: 930 l
- Width: 1.8 m
- Bale size: max. 1.6 m
- Bale weight: max. 1400 kg

Note:

Pressure relief valve required from 200 bar

Designation	kg	PG	Art. No.
Bale cutting bucket	660	35	27100
Pressure relief valve	1	35	17960

Other attachments available on request (e.g. Weidemann, Schäffer, Volvo, Bobcat,...)

Bale transport fork EURO

- With 2 or 4 tines to pick up bales quickly and easily
- Tines 1100 mm
- Height 0.60 cm
- Bale transport fork 1.20 m load capacity: 500 kg
- Bale transport fork 1.90 m load capacity: 1000 kg

Designation	kg	PG	Art. No.
Bale transport fork 1.20 m EURO, 2 tines (3rd tine optional)	62	35	17625
Bar bale transport fork 1.20 m	12	35	17644
Bale transport fork 1.90 m EURO, 4 tines	120	35	17650
Bar bale transport fork 1.90 m	19	35	17645
Spare tine 1100 mm, each	6	35	19801

Bale spike hydraulic EURO

- Folding of the tines and bar possible (compact transport position)
- Transport of up to 4 bales
- Load capacity: 1500 kg
- 3 x heavy duty tines 1100 mm, 45 mm diameter
- Hydraulic system: 1 x double-acting
- Height opened out: 2295 mm, folded up: 1430 mm
- Length opened out: 1280 mm, folded up: 400 mm
- Width: 1850 mm

Optional

- 2 x tines 1100 mm

Attachments for farmyard loader, wheel loader, telescopic loader per order - see p. 99

Designation	kg	PG	Art. No.
Hydraulic bale transport fork EURO	310	35	17760

Other attachments available on request (e.g. Weidemann, Schäffer, Volvo, Bobcat,...)

Bale transport fork, hinged, 3-point

- Hinged tines
- For 3-point attachment and triangle hitch
- Sturdy frame in U-profile
- With 2 tines to pick up bales quickly and easily
- Load capacity 500 kg
- 3-point attachment CAT 2
- Tines 1100 mm

Bale / Load transport

Designation	kg	PG	Art. No.
Bale transport fork 3-point hinged	43	35	17620

Bale transport fork 3-point

- For 3-point attachment and triangle hitch
- Sturdy frame in U-profile
- With 2 tines to pick up bales quickly and easily
- Load capacity 500 kg
- 3-point attachment CAT 2
- Tines 1100 mm

Adapters / Tractor triangle hitches

Snow blades / ploughs

Designation	kg	PG	Art. No.
Bale transport fork 3-point	37	35	17610

Rubber blades

Attachments for farmyard loader, wheel loader, telescopic loader per order - see p. 99

1100 mm tine length
Individually adjustable tines

A practical aid for transporting pallets. The 1.10 m long forged fork tines can be individually adjusted.

- For front loaders with EURO attachment
- 2 forged industrial tines
- Tine length 1100 mm
- Individually adjustable fork tines
- Standard fork support FEM II (size: 40.7 cm), **ISO**
- Tine cross-section 100 x 40 mm
- Pallet fork load capacity 2000 kg
- Load capacity per tine holder 250 kg
- Sturdy support frame
- Improved clear view

Optional

- Tine holder for pallet fork
- Thumb for pallet fork (see p.53)
- Bale support for fork support FEM II, **ISO**
- Push-on tubes for tine profile 100 x 40

Optional accessories

Designation	kg	PG	Art. No.
Pallet fork EURO, FEM II, ISO	218	35	16110
Pallet fork support unit FEM II, ISO	125	35	15050
Pallet fork tines FEM II, ISO , each	46	35	15100

Push-on tubes, set	32	35	16170
Tines 1100 mm, each	6	35	19801

Other attachments available on request
(e.g. Weidemann, Schäffer, Volvo, Bobcat,...)

THUMB FOR PALLET FORK

The pallet thumb is used as an accessory for the pallet fork with FEM II ISO or DIN attachment and is used for loading logs. It is also possible to handle light wood and shrub wood as well as to clamp various objects on the fork tines.

- Weight: 68 kg
- Tension values: 300 - 1300 mm
- 1 x double-acting connection required
- Approx. 2000 kg closing force

Bale / Load transport

Adapters / Tractor triangle hitches

Designation	kg	PG	Art. No.
Thumb for pallet fork FEM II, ISO	68	35	16200
Thumb for pallet fork FEM II, DIN	68	35	16210

CRATE ROTATING DEVICE

- Suitable for forklifts and vehicles with FEM II or FEM III, ISO standard
- Adjustable fork tines
- Fork support unit width: 1000 mm
- Rotary movement by double-acting hydraulic cylinder
- Turning range: 180°
- Load capacity: 2000 kg

Scope of supply:
Hydraulic hoses with quick-action couplings and a removable, hinged additional tine.
(Forklift tines not included.)

Accessories:
Forklift tines, pallet fork support unit

Snow blades / ploughs

To use the crate rotating device in the EURO attachment, the FEM II can be combined with the pallet fork support unit.

Designation	kg	PG	Art. No.
Crate rotating device FEM II	306	35	24200
Crate rotating device FEM III	320	35	24300
Pallet fork tines FEM II, ISO, each	46	35	15100
Pallet fork support unit FEM II, ISO	125	35	15050

Rubber blades

BIG BAG HOLDER EURO

The telescopic Big Bag holder has various adjustment options, making it suitable for nearly all Big Bags.

- EURO attachment
- Hook height 1300 - 1450 mm
- Width of the Big Bag attachment to the frame from 1150 - 1400 mm
- Weight: 111 kg
- Load capacity 1200 kg
- Hook depth: 700 – 1000 mm

Designation	kg	PG	Art. No.
Big Bag holder EURO	111	35	19250

3-POINT ATTACHMENT WITH TRAILER-HITCH BALL

This device is suitable for transport and manoeuvring of e.g. caravans, boat trailers or car trailers on private property.

- 3-point attachment
- Bolt diameter upper linkage: 19 mm
- Bolt diameter lower linkage: 22 mm
- Internal dimension lower linkage: 820 mm
- Car trailer hitch K50
- Coupling load: 150 kg
- Towed weight: max. 3500 kg

Attention

Not licensed for use in areas covered by the Road Traffic Act / Road Traffic Licensing Regulations!

Designation	kg	PG	Art. No.
3-point attachment with trailer-hitch ball	24	35	19220

TRACTOR AND DEVICE TRIANGLE HITCH

Tractor triangle hitch CAT 2

The tractor triangle hitch has a trailer-hitch ball with two external rollers for safe gripping and low-wear rolling coupling. It is suitable for devices up to 1400 kg (mounted machine centre of gravity max. 1.50 m).

Triangle hitch

Triangle hitch for devices up to 1500 kg

The snow blade with a working width of 2.00 m to 2.90 m is suitable for clearing paths and roads. The rubber scraper prevents damage to the road surface. The Comfort snow blade is equipped with a combination attachment for 3-point and EURO as a standard feature.

- Blade height: 80 cm
- Rubber scraper: 50 mm thick (can also be replaced in parts)
- Standard 3-point attachment CAT 2 and EURO attachment
- Swivels approx. 30° sideways
- Holders for standard support wheels/skids (except DSK 2.00 m snow blade)

Optional

- Hydraulic tilting with 2 cylinders
- LED lighting set (7-pin intermediate cable not included in delivery)
- Support wheels/skids

Rubber blades

The düvelsdorf snow plough consists of two centrally mounted swing wings, which are individually hydraulically adjustable. Due to the flexible adjustment options of left, right, straight and as a plough, the snow blade is ideal for use in various areas such as streets, squares and farmyards.

- Hydraulic adjustment
- Pendulum adjustment with springs for centring
- Combi-attachment 3-point attachment CAT 2 and EURO
- Double-acting control circuit with solenoid valve and change-over switch for the cab
- Rubber scraper with collision protection
- Holders for support wheels or skids (except snow plough 2.00 m)
- LED lighting set (7-pin intermediate cable not included in delivery)
- Minimum clearing width 30 cm smaller than blade width (by swivelling the snow blade)
- Blade height 80 cm

Rubber blade Combi

The rubber blade Combi has a 3-way attachment. The combination of EURO, 3-point and forklift attachment is an ideal prerequisite for fast and efficient use with various carrier vehicles.

The standard hydraulic side adjustment ensures good drainage and the rubber blade can be swivelled up to 30° to the right and left.

The ends can be swivelled mechanically by approx. 45°.

Rubber blades EURO mechanical

- Hot-dip galvanised frame
- Min. clearing width = 210 cm
- Max. tilt angle = 30°
- 3-way adjustable

2.60 m for EURO attachment with mechanical tilting. Ideal for cleaning feeding areas and putting out fodder. Hydraulic adjustment is available as an option.

Fodder clearing

Box scraper / Riding arena surface rake

The machine swivels mechanically to the left or right. It can be attached to the 3-point attachment, to the coupling triangle or front loader (for pawl attachments), with the combined attachment for EURO, 3-point and coupling triangle – and also to the power grab shovel bucket attachment.

The rotating wheel drive unit is executed above the ground. Hydraulic adjustment can be retrofitted at any time on request.

Technical data:

- Clearing width: approx. 150 cm
- Driven over the ground
- Adjustment to the left and right
- A 16.9/34 tyre is recommended. (not included in delivery)
- Galvanised

Optional

- Hydraulic swivelling and adjustment for fodder clearing machine 3-point + combination

Power grab shovel bucket attachment

Concrete mixer

The düvelsdorf box scraper is suitable for loosening and distributing bedding in stalls. The device can be coupled to the towing vehicle using the EURO attachment and can be swivelled into the working position using a double-acting control unit.

- Use of carrier vehicles with different widths possible due to flexible construction
- Adjustment of the tines' engagement depth in two heights
- Adaptation to your cubicles and stalls
- Possible arm lengths: 990 mm / 1070 mm / 1360 mm / 1470 mm / 1790 mm / 1890 mm
- Max. hydraulic pressure 180 bar
- Connectors: 1x double-acting

Designation	kg	PG	Art. No.
Box scraper	210	36	21100

Rubber blades

Box scraper / Riding arena

Hot-dip galvanized frame with 1.50 m, 2.00 m or 2.50 m working width. 3-point attachment.
 Suitable for every type of riding ground.

Standard with:

- Adjustable upper linkage
- Sideboard roller wheel
- Hot-galvanised track leveller
- Replaceable tines
- Adjustable floating levelling blade
- 3-point attachment CAT 1 and CAT 2

Weed sweeper with steel bristles

Steel bristles

PPN bristles

Plastic-coated steel bristles

The düvelsdorf weed sweeper is ideal for removing deeply rooted weeds. It is perfect for cleaning waysides, including kerbsides and paved areas. It is available with steel, PPN or plastic-coated steel bristles depending on requirements.

Adjustable safety guard

Brush plate

- Mechanical adjustment of sweeper intensity through longitudinal and transverse tilt
- Jockey wheel with continuous height-adjustment
- Swivelling on both sides for vehicle widths up to 2.60 m
- Pendulum adjustment to adapt the height
- Brush plate with diameter of 70 cm
- 38 steel, PPN or plastic-coated steel bristles
- Convenient bristle replacement
- Adjustable safety guard
- Parking support
- EURO attachment
- Driven by high-powered hydraulic motor with overload protection
- Oil flow rate: minimum 45 l/min, maximum 85 l/min

Designation	kg	PG	Art. No.
Weed sweeper PPN	228	28	22150
Weed sweeper steel	228	28	22100
Weed sweeper steel, plastic-coated	228	28	22160
Replacement bristles PPN, each	1	28	22140
Replacement bristles steel, each	1	28	22130
Replacement bristles steel, plastic-coated, each	1	28	22135

Note: The hydraulic hose set as well as bristles require assembly. Assembly time approx. 1 hour.

Oil flow rate: minimum 30 l, maximum 60 l
 Max. pressure 180 bar. If these values are exceeded,
 then a flow control valve must be fitted!

Sweeping machine DKE, figure shows optional extra equipment subject to a charge

You will really like the düvelsdorf Stratos sweeping machine with its tried and tested design in conjunction with practical details. The collection pan, for example, has been fitted with height-adjustable spindles; it is also possible to assemble the side brush to the left or right. Of course, the tried and tested add-on parts still fit on the basic body. The sweeping machine is ideal for cleaning dirty roads, farmyard areas, feeding tables or silo plates.

- For attachment to front loader, or to the front or rear hydraulics
- 3-point attachment with pendulum adjustment for CAT 1 and CAT 2
- Pendulum and height adjustment for mounting to front loader or farmyard loader or attachment of own make
- Forklift attachment
- Incremental mechanical (or hydraulic) tilting (not possible with DKE 1.50 m and forklift)
- Mechanical collection pan-emptying mechanism (hydraulic as option)
- Brush diameter 58 cm (polypropylene)
- Brushes can rotate in both directions
- Height-adjustable spindles for support wheels and dirt pan
- Strengthened middle bolt
- Guide wheels mounted in ball bearings
- Assembly times sweeping machine 2 hours, side brush 1 hour

Bolt reinforcement

Accessories: see page 76 + 77

When mounted in the front, a 3rd support wheel is recommended.

Replacement drill body 150 mm	34	36	39005

Concrete mixer

750 l capacity

The düvelsdorf concrete mixer 750 can be used for quick, convenient, inexpensive and high-quality production of even large quantities of concrete, mortar and screed. It also can be used for seed pickling.

The concrete mixer is equipped with a sturdy, tried and tested oil-bath gearbox. It transfers the force to the four spring-mounted arms of the stirring mechanism. The adjustable stirring blades guarantee excellent mixing action for all types of concrete and mortar.

The concrete mixer can be picked up by the tractor hydraulic system or with a pallet fork.

Attention!

Fill the gear unit with oil before initial operation!
Oil not included in delivery.

Splashguard, tilting bar, sack opener

Chute, swivelling

Attachment for pallet fork

Oil-bath gearbox drive with normal PTO profile.
Recommended tractor power: from 70 hp

- Solid workmanship
- Sturdy oil bath gearbox
- Spring-loaded stirring arms with adjustable stirring blades
- Side wall scraper
- 3-point attachment CAT 2
- Sheet thickness: floor 6 mm / wall 5 mm
- Drive: 1100 Nm

Scope of supply

- Splashguard, tilting bar, side wall scraper, chute, sack opener and heavy-duty protective grating

Optional

- Drive shaft with overload protection
- Swivelling chute

Designation	kg	PG	Art. No.
Concrete mixer DBM 750 L	570	75	25500
Drive shaft with overload protection	13	75	25002
Swivelling concrete chute	32	75	25100

ADJUSTABLE PASTURE GATE

Height 110 cm

Accessories:

- Universal posts, hot-dip galvanised -
Dimensions: 200 x 9 x 9 cm,
Wall thickness 3 mm with 2 slopes
and 2 holes for lock
- Suspension for pasture gate,
hot-dip galvanised
- Pasture gate lock with chain

- Adjustable width
- Hot-dip galvanised
- With 2 adjustable eyes and 2 locking bolts

Designation	kg	PG	Art. No.
Pasture gate 2-3 m	38	20	11023
Pasture gate 3-4 m	49	20	11034
Pasture gate 4-5 m	60	20	11045
Pasture gate 5-6 m	71	20	11056
Universal posts	17	20	11501
Pasture gate suspension	1	20	10200
Pasture gate lock with chain	0.8	20	10300

ROUND PASTURE FEEDER WITH 9 OR 12 FEEDING PLACES

Round pasture feeder standard with 9 or 12 feeding places. This round pasture feeder is a tried and tested standard model for pasture feeding. You can easily transport it with the tractor's linkage drawbar.

The circular arrangement lets lower-ranking animals feed at the same time. The standard round pasture feeder is filled from above using a front loader or manually from the side.

- 9 feeding places Ø 1.70 m
- 12 feeding places Ø 2.30 m

Designation	kg	PG	Art. No.
Round pasture feeder 9 places	145	10	70100
Round pasture feeder 12 places	198	10	70200

SQUARE PASTURE FEEDERS

- With 12 feeding places
- Transport with linkage drawbar possible
- With collecting trough and roof covering
- Roof with protected corners
- Roof adjustable in height
- Supplied unassembled

Technical data:

- Length 2000 mm
- Width 2000 mm
- Height approx. 2600 mmm

Corner protection for the roof

- With 8 feeding places
- Folding attachment
- Forklift pockets
- With collecting trough and roof covering
- Roof with corner protection all around
- Roof adjustable in height
- Supplied unassembled

Technical data:

- Length 1500 mm
- Width 1500 mm
- Height approx. 2200 mmm

Designation	kg	PG	Art. No.
Square pasture feeder with palisade feeding grating, 12 feeding places	360	10	50550
Square pasture feeder with palisade feeding grating, 8 feeding places	225	10	50530

Note: Delivered unassembled. Final assembly approx. 2 hours

All prices net plus statutory value added tax. Non-binding technical data, subject to alteration without notice!

Splash-proof transport box for transporting and storing e.g. tools, chainsaws or similar utensils.

- 3-point attachment CAT 1 and CAT 2
- with triangle hitch CAT 0 attachment to smaller vehicles
- Load capacity 1.20 m: approx. 300 kg
- Load capacity 1.60 m: approx. 400 kg
- Sheet thickness: 2 mm

Designation	kg	PG	Art. No.
Transport box 1.20 m, internal dimensions = 1200 x 650 x 500 mm	110	35	20010
Transport box 1.60 m, internal dimensions = 1600 x 650 x 500 mm	125	35	20015
Triangle hitch CAT 0 for transport box NEW	13	35	20019

Pasture gates / Pasture feeders
Transport boxes

The düvelsdorf HD transport box is ideal for agriculture and forest management, contractors or local authorities. With a width of 1.80 m and an interior volume of 1100 litres, the box can transport tools, seeds, canisters or other utensils. The interior can be divided with two individually moveable partitions to organise storage. The box is splash-proof, lockable and opens comfortably thanks to gas pressure dampers.

Rear containers
Work platforms / Screw conveyors

Furthermore, the HD transport box is equipped with a front position lamp, mounting plates for swivel castors and a drive-in opening for forklift trucks. The three-point attachment (CAT 1 and CAT 2) allows the transport box to be quickly mounted on the tractor. The load capacity is 1000 kg.

Designation	kg	PG	Art. No.
HD transport box 1.80 m, internal dimensions = 1790 x 890 x 900 mm	290	35	20000

Forestry devices

Rear containers can be used as transport containers for tools and bulk goods. The standard rear container has a pendulum-mounted removable rear flap and a scrape rail.

- 3-point attachment CAT 1 and CAT 2
- Mechanical tipping device
- Universal for all tractors
- Low tare weight
- Load capacity: 500 kg
- Sheet thickness: 2 mm

Mechanical tipping device

Designation	kg	PG	Art. No.
Rear container standard 1.20 m, internal dimensions = 1200 x 800 x 600 mm	102	35	20020
Rear container standard 1.40 m, internal dimensions = 1400 x 800 x 600 mm	113	35	20040
Rear container standard 1.60 m, internal dimensions = 1600 x 800 x 600 mm	123	35	20060
Rear container standard 1.80 m, internal dimensions = 1800 x 800 x 600 mm	133	35	20080
Rear container standard 2.00 m, internal dimensions = 2000 x 800 x 600 mm	143	35	20090

A practical rear container for the 3-point attachment with particularly solid workmanship and mechanical tipping device. This creates a transport and storage option for every tractor.

- With rear flap
- Solid workmanship
- 3-point attachment CAT 1 and CAT 2
- Load capacity: 800 kg
- Scrape rail
- Sheet thickness: 2 mm

Mechanical tipping device

Designation	kg	PG	Art. No.
Rear container 1.40 m mechanical, internal dimensions = 1370 x 1000 x 400 mm	170	35	20140
Rear container 1.60 m mechanical, internal dimensions = 1570 x 1000 x 400 mm	188	35	20160
Rear container 1.80 m mechanical, internal dimensions = 1770 x 1000 x 400 mm	206	35	20180

Hydraulic dump device

Hydraulic rear container elevation

- With rear flap
- Solid workmanship
- 3-point attachment CAT 1 and CAT 2

- Load capacity 1000 kg
- Scrape rail
- Sheet thickness: 3 mm

Designation	kg	PG	Art. No.
Rear container 1.60 m hydraulic, internal dimensions = 1560 x 1150 x 400 mm	339	35	21160
Rear container 1.80 m hydraulic, internal dimensions = 1760 x 1150 x 400 mm	355	35	21180
Rear container 2.00 m hydraulic, internal dimensions = 1960 x 1150 x 400 mm	372	35	21200
Hydraulic rear container elevation, all sizes, height 400 mm	25	35	21220

Pasture gates / Pasture feeders
Transport boxes

The standard EURO container can easily be mounted in the tractor's EURO attachment and is therefore ready for use very quickly.

This lets you transport objects safely and conveniently with the front loader.

Rear containers

- With front flap
- Solid workmanship
- EURO attachment
- Load capacity 500 kg
- Scrape rail
- Sheet thickness: 2 mm

Work platforms / Screw conveyors

Designation	kg	PG	Art. No.
EURO container standard 2.00 m	148	35	20590

Forestry devices

- For Euro quick-change frames
- With wooden protection strip on the handrail
- With tool tray
- EC type approval
- Self-closing door
- Circular spirit level for indication of inclined position

Optional

- Elevation by 1.00 m

Before commissioning, the combination (work platform, front loader, tractor) must be approved. The inspection is subject to a fee.

Attention: Elevation is only suitable for work platforms built 2018 or later

Designation	kg	PG	Art. No.
Work platform 1.10 m, internal dimensions: 1040 x 790 x 1100 mm	180	35	23050
Elevation for work platform 1.10 m	95	35	23055
Work platform 1.60 m, internal dimensions: 1540 x 790 x 1100 mm	245	35	23100
Elevation for work platform 1.60 m	110	35	23105

Stainless steel

Oil flow rate: Min. 20 l/min, max. 60 l/min. at max. 180 bar. If these values are exceeded, then a flow control valve must be fitted!

Figure shows optional extra equipment subject to a charge

- Drive via hydraulic motor with 4 m hose (requires 1 single-acting and 1 non-pressurised return flow line)
- Overall length 3 m / 4 m, Ø 140 mm
- Stainless steel for a long service life
- Filling hopper with sieve
- Cleaning slide gate for easy cleaning
- Painted add-on parts to fit all dump trucks
- Sloping adjustment by means of rope pulleys and metal braces
- Output of up to 20 t/h
- Screw conveyor in robust packaging

Optional

- Cut-off valve with 2 x 1 m hose
- Flexible discharge hose, 1.20 m
- Rope winch

Filling hopper with sieve

Cut-off valve

Designation	kg	PG	Art. No.
Screw conveyor 3 m	94	42	10150
Screw conveyor 4 m	122	42	10240
Cut-off valve with 2 x 1 m hose	2	42	30100
Flexible discharge hose, 1.20 m with clamp	2	42	10400
Rope winch	5	42	10490

The combination log gripper has both a front loader EURO attachment and a 3-point attachment CAT 2.

The robust multi-purpose blade with chain slots can be used for stacking tree trunks, pushing them together and lifting them. The robust frame design offers many coupling options that are suitable for any tractor.

The gripper can be either rigidly or pendulum-suspended. A perfectly safe conversion to the rigid version is possible without tools by simply inserting the locking bolts. It is not necessary to dismantle the gripper.

- Min. gripper opening 200 mm
- Max. gripper opening 1560 mm
- Cylinder closing force 9000 kg
- Pendulum-mounted in universal joint
- Tractor rating from 44 kW
- 1 double-acting connection required

Optional

- Hydraulic drive for gripper

Designation	kg	PG	Art. No.
Log gripper DFK Combi	285	35	23370

GRAB FOR LOG GRIPPER

Rear containers

Designation	kg	PG	Art. No.
Grab for log gripper DFK Combi	169	35	23160

HYDRAULIC DRIVE LOG GRIPPER

NEW

With this optional hydraulic drive (limited by hoses), you control the log gripper's rotary movement easily and conveniently from the tractor seat.

Min. oil flow rate 20 l / max. oil flow rate 60 l / max. pressure 180 bar. If these values are exceeded, then a flow control valve must be fitted!

Designation	kg	PG	Art. No.
Hydraulic drive log gripper DFK Combi	15	35	23175

Work platforms / Screw conveyors
Forestry devices

All prices net plus statutory value added tax. Non-binding technical data, subject to alteration without notice!

The timber grab with double hydraulic upper arm makes it safe and practical to move, stack and load logs from the carrier vehicle.

No matter whether this means trunks, sawn lengths or even trees with the branches still on, everything is moved easily to where it is required.

The large opening width can pick up several trunks safely and quickly at the same time. A great help for small trees and bushes.

- 1 x double-acting connection required
- EURO attachment
- Robust device for use in agriculture, forestry and municipal services, etc.
- Load capacity: up to 1600 kg
- Opening width: min. 140 mm - max. 1250 mm
- Weight: 300 kg
- Width: 1200 mm
- Depth: 1000 mm

Designation	kg	PG	Art. No.
Timber grab	300	35	23500

The reinforced concrete weight can be put to varied use on the carrier vehicle.

- Can be used as front or rear weight
- CAT 2 attachment
- Incl. upper link bolt
- Colour: Grey or Black (if available)

Optional

- Trailer manoeuvring aid (maximum load: 1200 kg)

Designation	kg	PG	Art. No.
Reinforced concrete weight 450 kg Black	450	28	21100
Reinforced concrete weight 750 kg Black	750	28	21200
